
P&B (γ = 1): standardised RMSE 13.8
master curve (α=1.45, β=0.57)
Folded response $s\,\bar{y}/\mathcal{R}_N$ $(y = r/\sigma_{24h})$
P&B coordinate $q\,a/\mathcal{Q}_N$ $(\gamma = 1)$
Activity surface: standardised RMSE 3.4
master curve (α=3.70, β=0.15)
Folded response $s\,\bar{y}/\mathcal{R}_N$ $(y = r/\sigma_{24h})$
Activity-adjusted coordinate $q\,a^{\gamma}/\mathcal{Q}_N$ (γ=0.41)
Relative-activity decile ($a = V/V_{24h}$), low → high
