
P&B (η = 1): standardised RMSE 13.8
master curve (α=1.45, β=0.57)
Folded response $s\,\bar{y}/\mathcal{I}_N^\star$ ($y = r/\sigma_{24h}$)
P&B coordinate $x/\mathcal{Q}_N$ ($x = q\,\nu$, $\eta = 1$)
Activity surface: standardised RMSE 3.4
master curve (α=3.70, β=0.15)
Folded response $s\,\bar{y}/\mathcal{I}_N^\star$ ($y = r/\sigma_{24h}$)
Activity-adjusted coordinate $x_\eta/\mathcal{Q}_N$ ($x_\eta = q\,\nu^\eta$, η = 0.41)
Relative-activity decile ($\nu = V/V_{24h}$), low → high
